

LCTV 2201A

22" LCD TV and Monitor

The highest resolution television in America.

1600 X 1200 native resolution. Includes integrated tuner with PIP.

Luce models are ideal as stand-alone super-thin TV's for the bedroom, kitchen, office, bathroom, yacht or plane, plus as high-resolution PC or Mac monitors... all in one!

Integrated cable TV tuner with PIP

Unlike competitors' monitors, the LCTV-2201A is a complete stand alone TV, no additional components needed, plus it offers 2 source simultaneous viewing!

W-UXGA (1600 x 1200) resolution with PC/Mac input

Luce LCTV 2201A is the only 22" flat-panel model available that serves as a TV, a high resolution computer monitor and as an HDTV monitor.

16:9 wide aspect ratio screen format

Ideal for DVD, DTV and HDTV source material

Integrated aspect ratio and scan rate scaler with 4 color temperature settings

Allows for HDTV viewing or wide screen PC display. Will fill screen to correct format with ideal image quality.

High brightness and wide viewing angle

Allows for viewing in strong light and from almost any angle in the room.

Solid aluminum cabinet

High tech and high style design fits well in any décor on table top or on wall. (Mounting accessories optional.)
